

ENTERPRISE ARCHITECTURE

Acuity Innovations offers Enterprise Architecture capability that is forward thinking, built on automation, and embedded into key processes and methodologies creating clarity and underpinning advanced warfighting capability development.

DELIVERY APPROACH

Our approach is aimed at timely, accurate, and expertly defined architectures that provide clarity to complex DoD environments. We deliver detailed, agile architectural artifacts with minimal disruption, forming a strong foundation for seamless operational transitions. By identifying the relationships between architecture types, we ensure traceability of defense resources to the operational needs of the warfighter. Through the development of cogent roadmaps, the identification of desired end-states, and reference architectures stakeholders gain and maintain an actionable understanding through key guiding artifacts.

CAPABILITY VALUE

ITERATIVE DEVELOPMENT

- Tailored architectures
- Mission focused
- Fully defined operations
- Organizational understanding
- Full operations to system mapping

INTEGRATED ARCHITECTURES

- Full-spectrum architectures
- Aligned with DoD strategic objectives
- Defense and Industry Architecture Frameworks
- Traceability

HIGH VALUE DELIVERY

- Sufficient detail evolved at a high pace
- Rapid iteration
- Direct agile development support
- Fully enabling operational acceptance/transition
